

# Searching

---

- ```
[model-class-name].objects  
.get(  
    [underscore-separated-attribute]_contains  
   ="[search-query]"  
)
```

Similarly:

- ```
[model-class-name].objects  
.get(  
    [underscore-separated-attribute]_startswith  
   ="[search-query]"  
)
```

# Migrations

---

- Migrations allow you to revert changes in database if you need to.
